**Extensions of httpd or webserver to allow configruing incoming FAX by ISP's
draft-website-fax-00.txt**

Abstract

This document describes the need for a FAX recieving services that can be easily supported by a ISP who can afford a fax machine and those who own domains and websites using ISPs should be able to recieve FAX.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on Aug 21, 2015.

Table of Contents

1. Introduction	2
2. Background	2
3. General Information of the service	2
4. Authors Addresses	3
5. Acknowledgements	3

[1. Introduction](#)

To implement a FAX recieving service to a website to help mobile computing using thin client devices.

[2. Background](#)

I am renting website / hosting in bluehost.com and i should be able to reieve FAXES in my domainname.

3. General Information of the service

I own domain explodingmoon.org, dhyanyoga.info, pradeepkumarxplorer.com.

Someone should be able to type in explodingmoon.org to a FAX machine
and

i should be able to see it in a folder /FAXES or some name appropriate.

4. Authors' Addresses

Pradeep Kumar Xplorer

URI: <http://www.explodingmoon.org>

<http://www.dhyanyoga.info>

5. Acknowledgement

This is a need for me as i own a domain and i can pay may be 2 dollars for
more

to receive FAXES using my domain, instead of owning a phone and FAX line and
a mobile computing device.
