Media Type Registrations for OEBPS Package File (OPF)

Status of this memo

By submitting this Internet-Draft, each author represents that any applicable patent or other IPR claims of which he or she is aware have been or will be disclosed, and any of which he or she becomes aware will be disclosed, in accordance with [Section 6 of BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress".

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/lid-abstracts.txt>

The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>

This document is an individual submission to the IETF. Comments should be directed to the author.

Abstract

This document serves to register a media type for the Open eBook Publication Structure (OEBPS) Package Files.

8.	Copyright Notice.....	6

1. Introduction

The present document seeks to register a media type for the Open eBook Publication Structure (OEBPS) Package File (OPF). The OPF file is an XML file that describes an OEBPS Publication. It identifies all other files in the publication and provides descriptive information about them. OPF and its related standards are maintained and defined by the International Digital Publishing Forum (IDPF).

The media type defined here is needed to correctly identify OPF files when they are edited on disk, referenced in OEBPS Container files, or used in other places where media types are used.

2. Security Considerations

The OPF files contain well formed XML conforming to the XML 1.0 specification.

Clearly it is possible to author malicious files which, for example, contain malformed data. Most XML parsers protect themselves from such attacks by rigorously enforcing conformance.

All processors that read OPF files should rigourously check the size and validity of data retrieved.

There is no current provision in the OEBPS Package File standard for encryption, signing, or authentication within the file format.

3. IANA Considerations

The present document requests that IANA registers the media type application/oebps-package+xml as specified in [Section 3.1](#). The registration uses the template present in [[RFC4288](#)].

3.1. Media Type for Downloadable Sounds

Type name:	application
Subtype name:	oebps-package+xml
Required parameters:	none
Optional parameters:	none
Encoding considerations:	OPF files are UTF-8 or UTF-16

Security considerations: none

Interoperability considerations: none

Published specification: Specification is published by the International Digital Publishing Forum and can be found at <http://www.idpf.org/oebps/oebps1.2/download/oeb12-xhtml.htm>

Applications which use this media type:

- 1) eBook Technologies, Inc.
eBook reading system.
- 2) Microsoft Reader
- 3) OSoft reader
- 4) Content Reserve Publishing
System
- 5) IDPF Container WG
- 6) PC Reader.com
- 7) MobiPocket reader

Additional information:

Magic number(s): none

File extension(s): .opf

Macintosh file type code(s): TEXT

Person & email address to contact for further information:
Nick Bogaty (nbogaty@idpf.org)

Intended usage: COMMON

Restrictions on usage: None

Author: International Digital Publishing
Forum (www.idpf.org)

Change controller: International Digital Publishing
Forum (www.idpf.org)

4. RFC Editor Considerations

The references to RFC XXXX in the media type registration need to be replaced with the actual RFC number when it is issued.

Please remove this section before publication as RFC.

7. IPR Notice

The IETF takes no position regarding the validity or scope of any Intellectual Property Rights or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights. Information on the procedures with respect to rights in RFC documents can be found in [BCP 78](#) and [BCP 79](#).

Copies of IPR disclosures made to the IETF Secretariat and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this specification can be obtained from the IETF on-line IPR repository at <http://www.ietf.org/ipr>.

The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights that may cover technology that may be required to implement this standard. Please address the information to the IETF at ietf-ipr@ietf.org.

This Internet-Draft expires in August 2006.

8. Copyright Notice
