The need for email archival option in email clients
draft-emailarchiveitoption-std-03

Abstract

This document describes the need for a email archive option button or check box in email client to make sure of accountability of emails, transmission delivery and control of email SPAM

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on Jan 19, 2020.

[1. Introduction](#)

This document describes the need for a email archive option button or check box in email client to make sure of accountability of emails, transmission delivery and control of email SPAM.

[2. Background](#)

If i send an email from pradeepan88@hotmail.com to sovereignamber@hotmail.com theres no guarantee it would be delivered, theres no proof that pradeepan88@hotmail.com wrote it, theres no guarantee originator is spam. I recieved emails from efcc.nigeria.org@representative.com about a ATM valued 8.3 million dollars issued to be in Feb 2013 i responded followed their instructions and still does not have the ATM instead i was harmed in low class western medical hospitals and the email pradeep@explodingmoon.org i used disabled by disabling the website for nonpayment.If my email client had a archiveit checkbox then archive.org can be used to archive it.

The same functionality can be achieved by a standard email for any archive website. If i want to archive it in archive.org i cc

archiveit@archive.org,
if i want to archive in gmail.com i cc archiveit@gmail.com and an
automatic
email response would be recieved giving the location of the archives.
The
archiveit checkbox would result in archiving in some standard
location. For
flexibility of options the cc email to archiveit@archive.org or
similar should
be used.

3. General Information of the service

Nowadays backup is not costly as terrabytes can be obtained for dollars and not millions. I am stranded outside my natural land of california because of racist criminals stealing my money and using a birth place and the criminals there to exploit it and having been sending many SOS emails. I have send emails with evidence of crime to many authortiy emails.

I do not have a solution by delivery of money and is being stolen. The authority

recipients cannot held liable as theres no evidence to public i have reported

the crime. If for every email for which the sender checks in archiveit option

as a checkbox or button then i can hold the authorities liable and punish

them for financial crime if it is archived in a specific URL in archive.org

that can be derived from the email.
