Authors: T. Hardie

Updated registration rules for URI.ARPA

Abstract

This document updates RFC 3405 by removing references to the IETF tree from the procedures for requesting that a URI scheme be inserted into the uri.arpa zone.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on 18 April 2021.

1. Introduction

Part five of the Dynamic Delegation Discovery System (DDDS), [RFC 3405](#) [[RFC3405](#)], describes the registration procedures for assignments in URI.ARPA. The document requires that registrations be in the "IETF tree" of URI registrations. The use of URI scheme name trees was defined in [RFC 2717](#) [[RFC2717](#)] but discontinued by [RFC 4395](#) [[RFC4395](#)] and its successors. Since the use of trees was discontinued, there is no way in the current process set out in [BCP 35](#) [[RFC7595](#)] to meet the requirement to register within that tree.

1.1. Requirements Language

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "NOT RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in BCP 14 [[RFC2119](#)][[RFC8174](#)] when, and only when, they appear in all capitals, as shown here.

2. Updated Requirements

This document removes the normative requirement from RFC 3405 for registrations in URI.ARPA to be from the IETF URI Tree.

All registrations in URI.ARPA MUST now be for schemes which are permanent registrations, as they are described in BCP 35.

3. IANA Considerations

This entire document is updated instructions to IANA.

4. Security Considerations

This update does not change the Security Considerations in RFC 3405
