Iris.arpa is Deprecated
draft-hardie-iris-arpa-00

Abstract

This document requests that iris.arpa and areg.iris.arpa be removed from the arpa zone.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on July 14, 2018.

[1.](#) Introduction

The Internet Registry Information Service[RFC3981] described a client-server protocol for querying Internet registries. One intended usage of the protocol was address registries, described in [RFC4698]. That document requested the Internet Architecture Board (IAB) to instruct IANA to insert a new label under .arpa. The IAB requested that delegation as set out in [RFC3172], and IANA set up both iris.arpa and a sub-delegation, areg.iris.arpa, as requested.

[2.](#) Recommendation

While IRIS was specified for this usage, it was not deployed for this purpose. At the request of the IAB, IANA reviewed usage statistics for the iris.arpa zone and found zero queries for areg.iris.arpa or NAPTR records during the survey period.

This document recommends that these delegations be removed from .arpa. If approved, the IAB is requested to instruct IANA to remove them.

[3.](#) IANA Considerations

This document requests that IANA remove .iris.arpa and its sub-delegations from the arpa zone upon receiving the relevant approval of the IAB.

[4.](#) Security Considerations

If there are users which are testing for the presence of this domain, those tests will fail. Without evidence of the existence of those tests or knowledge of their purpose, the impact is unknown.

[5.](#) Acknowledgements

Michelle Cotton and ICANN staff gathered the DNS request data on iris.arpa utilization. Michelle Cotton and Andy Newton reviewed this document.
