

Running DNS in Existing QUIC Connections
draft-hoffman-dns-in-existing-quic-01

Abstract

This draft is now a tombstone. The -00 version of this document has a likely-bad suggestion of how to run DNS service over existing QUIC connections, such as those being used for HTTP for basic web service. The author no longer recommends to do this.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on November 3, 2017.

[1.](#) Introduction

This draft is now a tombstone. The -00 version of this document has a likely-bad suggestion of how to run DNS service over existing QUIC connections, such as those being used for HTTP for basic web service. The author no longer recommends to do this.

[2.](#) Security Considerations

None, because this is a tombstone draft.
