Intended status: Standards Track

Expires: May 31, 2018

# Simple DNS Queries and Responses in JSON draft-hoffman-simplednsjson-01

#### Abstract

This draft is now a tombstone. The -00 version of this document has a likely-bad suggestion of how encode DNS queries for A and AAAA RRtypes, and only for those RRtypes, in JSON. The author no longer recommends to do this.

#### Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of  $\underline{BCP}$  78 and  $\underline{BCP}$  79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <a href="http://datatracker.ietf.org/drafts/current/">http://datatracker.ietf.org/drafts/current/</a>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on May 31, 2018.

## Introduction

This draft is now a tombstone. The -00 version of this document has a likely-bad suggestion of how encode DNS queries for A and AAAA RRtypes, and only for those RRtypes, in JSON. The author no longer recommends to do this.

# 2. Security Considerations

None, because this is a tombstone draft.
