**Need for associating email address to device address and phone numbers
draft-httpemaildevphone-01**

Abstract

This document describes the need for associating email address to device
address
and phone numbers

Status of This Memo

This Internet-Draft is submitted in full conformance with the
provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering
Task Force (IETF). Note that other groups may also distribute
working documents as Internet-Drafts. The list of current Internet-
Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months
and may be updated, replaced, or obsoleted by other documents at any
time. It is inappropriate to use Internet-Drafts as reference
material or to cite them other than as "work in progress."

This Internet-Draft will expire on May 13, 2019.

3. General Information of the service

For the user who just want emails and not net savvy, He or she has to be able to walk into a store and get a device like android and get an email address also from that vendor. The buyer should also be to map his phone number to email address. I should be able to type phone number or even the device MAC address in the to field of email and get it delivered to the device that has the phone number or device MAC Address.

This increases usability. This with restrictions on functions to a device by using some programming like <https://datatracker.ietf.org/doc/draft-pradeep-kumar-xplorer-posvm/> to allow a device to be used only for emails can make emails usable to a wider audience who are not computer savvy.
