IANA Allocation Procedures for OTN Signal Type Subregistry of  
the GMPLS Signaling Parameters Registry  
draft-ietf-ccamp-otn-signal-type-subregistry-05.txt

#### Status of this Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on September 17, 2016.

This document is subject to [BCP 78](#) and the IETF Trust's Legal Provisions Relating to IETF Documents (<http://trustee.ietf.org/license-info>) in effect on the date of publication of this document. Please review these documents carefully, as they describe your rights and restrictions with respect to this document. Code Components extracted from this document must include Simplified BSD License text as described in Section 4.e of the [Trust Legal Provisions](#) and are provided without warranty as described in the Simplified BSD License.

This document may contain material from IETF Documents or IETF Contributions published or made publicly available before November

[draft-ietf-ccamp-otn-signal-type-subregistry-05.txt](#)

10, 2008. The person(s) controlling the copyright in some of this material may not have granted the IETF Trust the right to allow modifications of such material outside the IETF Standards Process. Without obtaining an adequate license from the person(s) controlling the copyright in such materials, this document may not be modified outside the IETF Standards Process, and derivative works of it may not be created outside the IETF Standards Process, except to format it for publication as an RFC or to translate it into languages other than English.

## Abstract

IANA has defined an "OTN Signal Type" subregistry of the "Generalized Multi-Protocol Label Switching (GMPLS) Signaling Parameters" registry. This document updates the OTN Signal Type subregistry specified in [RFC 7139](#) to allow Specification Required policies, as defined in [RFC 5226](#).

## [1.](#) Introduction

IANA maintains "OTN Signal Type" subregistry of the "Generalized Multi-Protocol Label Switching (GMPLS) Signaling Parameters" registry for the OTN signal defined in [\[RFC4328\]](#) and updated by [\[RFC7139\]](#). This subregistry is defined to use only the Standards Action registration policy as defined by [\[RFC5226\]](#). This document updates [\[RFC7139\]](#) to allow the "OTN Signal Type" subregistry to also support Specification Required policies, as defined in [\[RFC5226\]](#).

## [2.](#) Security Considerations

This document does not introduce any new security considerations to the existing GMPLS signaling protocols. Refer to [\[RFC7139\]](#)

for further details of the specific security measures. Additionally, [[RFC5920](#)] provides an overview of security vulnerabilities and protection mechanisms for the GMPLS control plane.

### [3.](#) IANA Considerations

IANA maintains the "OTN Signal Type" subregistry of the "Generalized Multi-Protocol Label Switching (GMPLS) Signaling Parameters" registry. The registry currently is defined to use the Standards Action registration policy as defined by [[RFC5226](#)].

Expires September 2016 [Page 2]

---

#### [draft-ietf-ccamp-otn-signal-type-subregistry-05.txt](#)

This document requests that the "OTN Signal Type" subregistry of the "Generalized Multi-Protocol Label Switching (GMPLS) Signaling Parameters" registry be updated with registration policies of "Standards Action" for Standards Track documents, and "Specification Required" for other documents.

When needed, the Designated Expert shall be any current CCAMP WG chair or, in the case the group is no longer active, designated by the IESG.

### [4.](#) Acknowledgments

The authors would like to thank Lou Berger, Deborah Brungard, Daniele Ceccarelli, Adrian Farrel, Vijay Gurbani, Huub van Helvoort, Barry Lieba and Robert Sparks for comments.
