A new Request for Comments is now available in online RFC libraries.

RFC 3368

Title: The 'go' URI Scheme for the Common Name Resolution
             Protocol
Author(s):   M. Mealling
Status: Standards Track
Date: August 2002
Mailbox: michael@verisignlabs.com
Pages: 8
Characters: 12726
Updates/Obsoletes/SeeAlso: None

I-D Tag: draft-ietf-cnrp-uri-07.txt

URL: ftp://ftp.rfc-editor.org/in-notes/rfc3368.txt

This document defines a URI scheme, 'go:' to be used with the Common
Name Resolution Protocol. Specifically it lays out the syntactic
components and how those components are used by URI Resolution to find
the available transports for a CNRP service. Care should be taken
with several of the URI components because, while they may look like
components found in other URI schemes, they often do not act like
them. The "go" scheme has more in common with the location
independent "news" scheme than any other URI scheme.

This document is a product of the Common Name Resolution Protocol
Working Group of the IETF.

This is now a Proposed Standard Protocol.

This announcement is sent to the IETF list and the RFC-DIST list.
Requests to be added to or deleted from the IETF distribution list
should be sent to IETF-REQUEST@IETF.ORG. Requests to be
added to or deleted from the RFC-DIST distribution list should
be sent to RFC-DIST-REQUEST@RFC-EDITOR.ORG.

Details on obtaining RFCs via FTP or EMAIL may be obtained by sending
an EMAIL message to rfc-info@RFC-EDITOR.ORG with the message body
help: ways_to_get_rfcs. For example:

        To: rfc-info@RFC-EDITOR.ORG
        Subject: getting rfcs

        help: ways_to_get_rfcs

Requests for special distribution should be addressed to either the
author of the RFC in question, or to RFC-Manager@RFC-EDITOR.ORG. Unless
specifically noted otherwise on the RFC itself, all RFCs are for

unlimited distribution.echo
