Unused DHCP Option Codes
draft-ietf-dhc-unused-optioncodes-06

Status of this Memo

This document is an Internet-Draft and is in full conformance with all provisions of [Section 10 of RFC2026](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/lid-abstracts.txt>.

The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>.

This Internet-Draft will expire on February 10, 2004.

Abstract

Prior to the publication of [RFC2489](#) (which was updated by [RFC2939](#)), several option codes were assigned to proposed DHCP options that were subsequently never used. This document lists those unused option codes and directs IANA to make these option codes available for assignment to other DHCP options in the future.

The document also lists several option codes that are not currently documented in an RFC but should not be made available for reassignment to future DHCP options.

1. Introduction

[Section 2](#) of this document lists the unused DHCP option codes from the IANA list of BOOTP and DHCP option codes [[1](#)]. Each option code includes any known documentation and contact information from the IANA list. IANA will make these option codes available for assignment to other DHCP options in the future.

[Section 3](#) lists several DHCP option codes that are not currently documented in an RFC but should not be made available for reassignment to future DHCP options.

2. Unused DHCP Option Codes to be Reassigned to Future DHCP Options

The option codes listed in this section are to be returned to IANA for reassignment to new options. Responses from associated contact persons are noted where they have been received.

2.1 Service Location Protocol Naming Authority

Code: 80

Name: Service Location Protocol Naming Authority

Defined in: (expired Internet-Draft)

Contact: Charlie Perkins

Reason to recover: Never published as standard and not in general use

2.2 Relay Agent Options

Codes: 83, 84

Name: Relay Agent Options

Defined in: Early draft of [RFC3046](#) [[2](#)]

Contact: (none)

Reason to recover: Not defined in [RFC3046](#) as published

[2.3 IEEE 1003.1 POSIX Timezone](#)

Code: 88

Droms Expires February 10, 2004

[Page 2]

Internet-Draft Unused DHCP Option Codes

August 2003

Name: IEEE 1003.1 POSIX Timezone

Defined in: (expired Internet-Draft)

Contact: Mike Carney

Reason to recover: Never published as standard and not in general use

[2.4 FQDNs in DHCP Options](#)

Code: 89

Name: FQDNs in DHCP Options

Defined in: (expired Internet-Draft)

Contact: Ralph Droms; agrees that option code should be
reassigned

Reason to recover: Never published as standard and not in general use

[2.5 VINES TCP/IP Server](#)

Code: 91

Name: VINES TCP/IP Server

Defined in: (none)

Contact: (none)

Reason to recover: Never published as Internet-Draft

[2.6](#) Server Selection

Code: 92
Name: Server Selection
Defined in: (none)
Contact: (none)
Reason to recover: Never published as Internet-Draft

Droms Expires February 10, 2004 [Page 3]

Internet-Draft Unused DHCP Option Codes August 2003

[2.7](#) LDAP Servers

Code: 95
Name: LDAP Servers
Defined in: (none)
Contact: (none)
Reason to recover: Never published as Internet-Draft

[2.8](#) IPv6 Transition

Code: 96
Name: IPv6 Transition
Defined in: (expired Internet-Draft)
Contact: Dan Harrington; agrees that option code should be
reassigned
Reason to recover: Never published as standard and not in general use

[2.9](#) Printer Name

Code: 100
Name: Printer Name
Defined in: (none)
Contact: (none)
Reason to recover: Never published as Internet-Draft

[2.10](#) Multicast Assignment through DHCP

Code: 101
Name: Multicast Assignment through DHCP
Defined in: (expired Internet-Draft)

Droms Expires February 10, 2004 [Page 4]

Internet-Draft Unused DHCP Option Codes August 2003

Contact: Baiju Patel, Munil Shah
Reason to recover: Never published as standard and not in general use

[2.11](#) Swap Path

Code: 108
Name: Swap Path
Defined in: (none)
Contact: (none)
Reason to recover: Never published as Internet-Draft

[2.12](#) IPX Compatibility

Code: 110

Name: IPX Compatibility
Defined in: (none)
Contact: Juan Luciani; agrees that option code should be
reassigned
Reason to recover: Never published as Internet-Draft

[2.13](#) Netinfo Parameters

Codes: 112, 113
Name: Netinfo Address, Netinfo Tag
Defined in: (none)
Contact: Marc Majka
Reason to recover: Never published as Internet-Draft

Droms Expires February 10, 2004 [Page 5]

Internet-Draft Unused DHCP Option Codes August 2003

[2.14](#) URL

Code: 114
Name: URL
Defined in: (none)
Contact: Vinod Valloppillil
Reason to recover: Never published as Internet-Draft

[2.15](#) Failover

Code: 115
Name: Failover
Defined in: Early revisions of "DHCP Failover Protocol" [3]
Contact: Kim Kinnear
Reason to recover: Current version of "DHCP Failover Protocol" does not use a DHCP option

[3.](#) Option codes to be reserved by IANA

The option codes listed in this section are the subject of ongoing work in the dhcp working group. These options codes should remain on the IANA list of assigned option codes [1] until the dhcp working group has made a final decision about their disposition.

[3.1](#) Option codes used in PXE Specification

The following option codes are used in the "Preboot Execution Environment (PXE) Specification, Version 2.1" [4]. However, although these options are in widespread use by devices that use PXE, none of these option codes have been described in a published RFC.

The dhcp WG will endeavor to have specifications for these options published.

[3.1.1](#) Client System

Code: 93

Droms Expires February 10, 2004 [Page 6]

Internet-Draft Unused DHCP Option Codes August 2003

Name: Client System
Defined in: "Preboot Execution Environment (PXE) Specification, Version 2.1" [4]
Contact: Michael Johnston (frenchy@quiet-like-a-panther.org)

[3.1.2](#) Client NDI

Code: 94

Name: Client NDI

Defined in: "Preboot Execution Environment (PXE) Specification, Version 2.1" [\[4\]](#)

Contact: Michael Johnston (frenchy@quiet-like-a-panther.org)

[3.1.3](#) UUID/GUID Client Identifier

Code: 97

Name: UUID/GUID Client Identifier

Defined in: "Preboot Execution Environment (PXE) Specification, Version 2.1" [\[4\]](#) (and an expired Internet-Draft)

Contact: Dan Harrington, Michael Johnston (frenchy@quiet-like-a-panther.org)

[3.2](#) Option Code Extensions

Note that these option codes are identified in "Extending DHCP Options Codes" [\[5\]](#) as part of a mechanism for extending the set of option codes available to DHCP. If these option codes are not used for DHCP option code extension, they will be returned to IANA for reassignment to other DHCP options.

Codes: 126, 127

Name: Option Code Extensions

Defined in: (expired Internet-Draft)

Contact: Ralph Droms

4. Already Returned for Reassignment

The option codes 99, 102-107, 109 and 111 have already been returned for reassignment to future DHCP options.

5. Security Considerations

This document has no known security implications, as none of the reclaimed options are known to be in use.

6. IANA Considerations

IANA has returned the DHCP option codes listed in [Section 2](#) to the list of available option codes. These option codes may be reassigned to new DHCP options, according to the procedures in [RFC 2939](#) [6].
