This document describes a Policy Information Base (PIB) for a device
implementing the Differentiated Services Architecture. The
provisioning classes defined here provide policy control over
resources implementing the Differentiated Services Architecture.
These provisioning classes can be used with other none Differentiated
Services provisioning classes (defined in other PIBs) to provide for a
comprehensive policy controlled mapping of service requirement to
device resource capability and usage.

This document is a product of the Differentiated Services (DIFFSERV)
Working Group of the IETF.

This memo provides information for the Internet community. It does
not specify an Internet standard of any kind. Distribution of this
memo is unlimited.

This announcement is sent to the IETF list and the RFC-DIST list.
