**Consolidated IASA2-Related Document Updates
draft-ietf-iasa2-consolidated-upd-04**

Abstract

In 2018, the IETF began the transition to a new administrative structure and updated its IETF Administrative Support Activity (IASA) to a new "IASA 2.0" structure. In addition to more substantive changes that are described in other documents, the transition to the 2018 IETF Administrative Support structure changes several position titles and organizational relationships that are referenced elsewhere. Rather than reissue those referencing documents individually, this specification provides updates to them and deprecates some now-obsolete documents to ensure that there is no confusion due to these changes.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on July 21, 2019.

[1.](#) Introduction

In 2018, the IETF began the transition to a new administrative structure, and updated its IETF Administrative Support Activity (IASA) to a new "IASA 2.0" structure [[RFC-Struct](#)]. Key IASA 2.0 changes have been specified in a series of documents, including changes to the IETF Trust [[RFC-trust-update](#)], the rationale for it [[RFC-trust-rationale](#)], a new defining document for the IETF Administration LLC [[LLC-Agreement](#)] (informally called the "IETF LLC" or just "the LLC" in places in this document and elsewhere) and adjustments to the procedures for nominations and selections for relevant positions [[RFC-7437bis](#)].

In addition to more substantive changes that are described in those and other documents, the IASA 2.0 structure changes several position titles and organizational relationships that are referenced in other

[Page 2]

documents. Rather than reissue those documents individually, this document provides a unified update to them.

This document updates RFCs 2028, 2418, 3005, 3710, and 6702 (citations in context below) to make those terminology and related changes. For clarity, it also obsoletes RFCs 3716 and 3929 which were Experimental or Informational documents that are no longer relevant (see [Section 4](#)). The sections that follow identify the details of the relevant documents and the required changes.

[[CREF1: Note in Draft: This document lists changes that the WG may choose to process as standalone replacement documents instead. The relevant sections are provided to speed things along should it decide to not do that.]]

2. Where Appropriate, Replacement of the IETF Executive Director position with the Managing Director, IETF Secretariat

Under the IASA 2.0 structure, most of the responsibilities of the former position of IETF Executive Director been assigned to a new position (or at least title) of Managing Director of the IETF Secretariat. An "Executive Director" title is now associated with different, and largely new, responsibilities as an Officer of the IETF Administration LLC. These changes are described in the description of the new structural arrangements [[RFC-Struct](#)].

This document applies that change to the following:

- o [RFC 2028](#), The Organizations Involved in the IETF Standards Process [[RFC2028](#)], [Section 3.3](#).
- o [RFC 2418](#), IETF Working Group Guidelines and Procedures [[RFC2418](#)]
- o [RFC 3710](#), An IESG Charter, [Section 2](#)[[RFC3710](#)].
- o [RFC 6702](#), Promoting Compliance with Intellectual Property Rights (IPR) Disclosure Rules, [Section 5](#) [[RFC6702](#)].

Note that the current description of the Internet Standards Process [[RFC2026](#)] does not require an update by this document for this purpose because the reference to the IETF Executive Director in [RFC 2026](#) was replaced by a document that precedes the current effort [[RFC3979](#)] and that was, in turn, obsoleted by [RFC 8179](#) [[RFC8179](#)].

3. Remove the IETF Executive Director as an Option

In a few cases, it is no longer appropriate for either the Managing Director, IETF Secretariat (former IETF Executive Director position) or the new IETF Executive Director (for the LLC) to perform a particular historical function. The relevant documents are updated to remove the IETF Executive Director from the list of people with specific responsibilities or authority. Those documents will not be updated to use "Managing Director, IETF Secretariat" but, instead, the mention of the position will simply be dropped.

This document applies that change to the following:

- o [RFC 3005](#), IETF Discussion List Charter [[RFC3005](#)], section titled "Charter for the IETF Discussion List". This document is modified to remove the authorization for the IETF Executive Director to restrict people from posting, etc.

4. Deprecated Documents

The IASA2 Working Group has also identified several RFCs that no longer apply as a result of the change to the new IASA 2.0 structure. The result is that several informational, experimental, or other RFCs can be deprecated.

This document deprecates the following:

- o [RFC 3716](#) [[RFC3716](#)], which describes the general administrative model of the IETF.
- o [RFC 3929](#) [[RFC3929](#)], which touches on aspects of the administration of the IETF, such as mentioning the IETF Executive Director. It dates to 2004 and is experimental.
- o [RFC 3979](#) [[RFC3979](#)], that is updated by [[RFC8179](#)], which corrects mentions of the IETF Executive Director to the IETF Secretariat.
- o [RFC 4633](#) [[RFC4633](#)], which is an experimental document that refers to IETF Executive Director. It describes a 2006 experiment that ran for 18 months.
- o [RFC 4879](#) [[RFC4879](#)], that is updated by [[RFC8179](#)], which corrects mentions of the IETF Executive Director to the IETF Secretariat.

It is also recommended that the above documents be reclassified to Historic to further reduce the risk of any confusion.

5. Acknowledgments

Brian Carpenter's careful checking and identification of documents that did, and did not, require consideration was essential to the draft in its current form.

6. Contributors

Jason Livingood did the hard work of identifying the documents that required updating and supplied considerable text used in this document.

7. IANA Considerations

[[CREF2: RFC Editor: Please remove this section before publication.]]

This memo includes no requests to or actions for IANA.

8. Security Considerations

The changes specified in this document are matters of terminology and organizational structure derived from documents it references. It should have no effect on Internet security.

[Appendix A](#). Change Log

RFC Editor: Please remove this appendix before publication.

[A.1](#). Changes from version -00 (2018-11-15) to -01

- o Removed RFCs 3979 and 4879 from the "obsoletes" list because they had already been obsoleted (by 8179). It also removes [RFC 8179](#) from the "updates" list because 8179 uses "IETF Secretariat" terminology rather than "IETF Executive Director".

[[CREF3: Note in Draft: That suggests an idea which might considerably mitigate the name confusion issue: Instead of singling out the Managing Director of the Secretariat as a named individual, perhaps we should be referring to the Secretariat itself, leaving the contact point or address up to them as an internal administrative matter. Just a thought. --JcK]]
- o Added text to explain why [RFC 2026](#) is not on the hit list.
- o Added an acknowledgment to Brian Carpenter. If he catches another batch of errors and supplies text, he gets promoted to Contributor.
- o Adjusted reference [[RFC-Struct](#)] to point to 4071bis.

- o Minor editorial corrections and changes.

A.2. Changes from version -01 (dated 2018-12-06 but posted 2012-12-07) to -02

I accidentally omitted [RFC 4844](#) from the document header "updates" list in Version 01 and noticed that in response to an unrelated question almost immediately after posting. The correction seemed important enough to justify almost immediate re-posting. Changes are only that header, the document file name, and the date. --JcK

A.3. Changes from version -02 (2018-12-07) to -03

- o Removed discussion and pointers to [RFC 7500](#) - IAB will publish separately.
- o Added text to describe (very superficially) [RFC 3716](#). That document was obsoleted in the previous version but not described.
- o Removed rant about titles and responsibilities from [Section 2](#) and a subsequent editorial note I hope it is no longer needed --JcK. In addition, several blocks of text that were commented out in earlier versions of the XML have been removed entirely.

A.4. Changes from version -03 (2018-12-12) to -04

- o Removed [RFC 4844](#) from the update list and discussion because the consensus in the WG seemed to be that it (and the RFC Editor) should be handled separately.
- o Removed [RFC 5377](#) from the update list and discussion because it involves the Trust.
- o Editor's note in draft:

The above changes and the earlier removal of [RFC 7500](#) so the IAB could publish its own document completely eliminate the earlier Sections [2](#) and [3](#). That may call for a revision of the Introduction and/or Abstract, but I have not done a review for this iteration of whether such changes are needed.

As documents and references are shuffled in and out of this one, it occurred to me that having a non-normative appendix somewhere that would identify all of the documents containing changes to reflect the IASA 1.x to 2.0 transition would be of great help to any future historian trying to understand what we did and probably helpful to the IETF if some of these changes don't work out and/or require further tuning. After a brief

discussion, Jason and I concluded that appendix did not belong in this iteration of this document.
