Deprecation of BGP Path Attribute values 30, 31, 129, 241, 242, and 234
[draft-ietf-idr-deprecate-30-31-129-01](https://datatracker.ietf.org/drafts/current/draft-ietf-idr-deprecate-30-31-129-01)

Abstract

This document requests IANA to mark BGP path attribute values 30, 31, 129, 241, 242, and 243 as "deprecated".

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](https://datatracker.ietf.org/drafts/current/bcp-78) and [BCP 79](https://datatracker.ietf.org/drafts/current/bcp-79).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on June 20, 2017.

[1.](#) Introduction

It has been discovered that certain BGP Path Attribute values have been used in BGP implementations which have been deployed in the wild while not being assigned by the IANA for such usage. Unregistered usage of BGP Path Attribute values can lead to deployment problems for new technologies.

The use of these unregistered values was noticed when BGP Large Communities attribute [[I-D.ietf-idr-large-community](#)] was initially assigned value 30 by IANA. It was subsequently discovered that a widely-deployed BGP-4 [[RFC4271](#)] implementation had released code which used path attribute 30 and which applied a "Treat-as-withdraw" [[RFC7606](#)] strategy to routes containing a valid Large Community attribute, since it was expecting a different data structure. Because these routes were dropped, early adopters of Large Communities were unreachable from parts of the Internet. As a workaround, a new Early IANA Allocation was requested.

The squatting of values 30, 31, 129, 241, 242 and 243 has been confirmed by the involved vendors or through source code review.

[2.](#) IANA Considerations

Per this document, IANA is requested to mark values 30, 31, 129, 241, 242, and 243 as "deprecated" in the "BGP Path Attributes" registry under the "Border Gateway Protocol (BGP) Parameters" group. The marking "deprecated" meaning "use is not recommended" ([[I-D.leiba-cotton-iana-5226bis](#)]).

[3.](#) Security Considerations

There are no meaningful security consequences arising from this registry update.
