A Template for IETF Patent Disclosures and Licensing Declarations

Status of this Memo

This document is an Internet-Draft and is in full conformance with all provisions of [Section 10 of RFC2026](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/1id-abstracts.txt>

The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>.

Abstract

This document describes a template for IETF patent disclosures and licensing declarations. The optional use of this template is meant to simplify the process of such disclosures and licensing declarations and to assist disclosers in providing the necessary information to meet the obligations documented in RFC XXXX.

[1](#). Introduction

RFC XXXX [i] documents the current IETF policies and obligations with respect to disclosure of patents and patent applications. It also documents the information requested in licensing declarations for IETF specifications. In the interest of making these patent disclosure and licensing declaration processes simpler, this document proposes a patent disclosure and licensing declaration template that may be optionally used as one method for IETF participants and patent holders to comply with patent disclosure requirements and licensing declaration provisions under RFC XXXX. For the latest information on how to submit a patent disclosure or licensing declaration, please see <http://www.ietf.org/ipr-instructions>.

[2](#). The Patent Disclosure and Licensing Declaration Template

START OF TEMPLATE

This document is an IETF Patent Disclosure and Licensing Declaration Template and is submitted to inform the IETF of a) patent information regarding the IETF document or contribution listed in Section IV, and b) a Patent Holder's intention with respect to the licensing of its necessary patent claims upon approval by the IESG for publication as an RFC of the relevant IETF specification. No actual license is implied by submission of this template. Please complete and submit a separate template for each IETF document or contribution to which the disclosed patent information relates.

I. Patent Holder/Applicant ("Patent Holder")

Legal Name:

II. Patent Holder's Contact for License Application

Title:

Department:

Address:

Telephone:

Fax:

Email:

IV. IETF Document or Contribution to Which Patent Disclosure Relates

Title:

RFC Number or I-D Tag:

Other Designations:

V. Disclosure of Patent Information (i.e., patents or patent applications required to be disclosed by [Section 6](#) of RFC XXXX)

A. For granted patents or published pending patent applications, please provide the following information:

Patent, Serial, Publication, Registration, or Application/File number(s):

Date(s) granted or applied for:

B. Does your disclosure relate to an unpublished pending patent application?

Select one: Yes _____ No _____

C. If an Internet-Draft or RFC includes multiple parts and it is not reasonably apparent which part of such Internet-Draft or RFC is alleged to be covered by the patent information disclosed in Section V(A) or V(B), it is helpful if the discloser identifies here the sections of the Internet-Draft or RFC that are alleged to be so covered.

VI. Licensing Declaration

The Patent Holder states that, upon approval by the IESG for publication as an RFC of the relevant IETF specification, its position with respect to licensing any patent claims contained in the

patent(s) or patent application(s) disclosed above that would necessarily be infringed by implementation of the technology required

by such IETF specification ("Necessary Patent Claims"), for the purpose of implementing the specification, is as follows (select one licensing declaration option only):

a) ___ No License Required for Implementers
solely Check here if this licensing declaration is limited
to standards-track IETF documents ___

b) ___ Royalty-Free, Reasonable and Non-Discriminatory License to
solely All Implementers
Check here if this licensing declaration is limited
to standards-track IETF documents ___

c) ___ Reasonable and Non-Discriminatory License to All
solely Implementers with Possible Royalty/Fee
Check here if this licensing declaration is limited
to standards-track IETF documents ___

d) ___ Licensing Declaration to be Provided Later (implies a

willingness to commit to the provisions of a), b), or c)

See (editor)

Expires - February 11, 2004

[Page 4]

above to all implementers; otherwise, the next option -
"Unwilling to Commit to the Provisions of a), b), or c)
Above" - must be selected)

e) Unwilling to Commit to the Provisions of a), b), or c)
Above

NOTE: The individual submitting this template represents and
warrants
that he or she is authorized by the Patent Holder to agree to the
above-selected licensing declaration.

VII. Contact Information of Submitter of this Form (if different
from
IETF Participant in Section III above)

Name:

Title:

Department:

Address:

Telephone:

Fax:

Email:

VIII. Other Notes:

END OF TEMPLATE

3. Commentary on Terms used in the Template

Section III requests contact information for the Patent Holder's
IETF
participant whose personal belief that necessary patent claims are
implicated by an IETF document or contribution caused this template
to be filed. This is an optional section. However, if Section III is
not completed, then Section VII must be completed. Even if Section
III is completed, Section VII must still be completed if the
submitter of this template is different from the IETF participant
identified in Section III.

See (editor)

Expires - February 11, 2004

[Page 5]

The "Other Designations" field in Section IV may be used to identify an IETF contribution (oral or written) other than an Internet-Draft or RFC to which a disclosure is related.

Here is an explanation of the licensing declaration options in Section VI of the template:

a) No License Required for Implementers: The Patent Holder does not require parties to acquire any license to its Necessary Patent Claims in order to make, have made, use, import, offer to sell, sell, or distribute technology that implements such IETF specification.

b) Royalty-Free, Reasonable and Non-Discriminatory License to All Implementers: The Patent Holder is willing, upon request, to grant a license to its Necessary Patent Claims to all persons on a royalty-free basis (i.e., no royalty or other fee) and under reasonable and non-discriminatory terms, to make, have made, use, import, offer to sell, sell, and distribute technology that implements such IETF specification.

c) Reasonable and Non-Discriminatory License to All Implementers with Possible Royalty/Fee: The Patent Holder is willing, upon request, to grant a license to its Necessary Patent Claims to all persons under reasonable and non-discriminatory terms (which may include a royalty/fee), to make, have made, use, import, offer to sell, sell, and distribute technology that implements such IETF specification.

d) Licensing Declaration to be Provided Later: The Patent Holder is willing to commit to the provisions of a), b), or c) above to all implementers of the IETF specification, but wants to defer its specific selection of one of these licensing declaration options until a later point in time (or when asked for this information by the IESG). This option may not be selected if the Patent Holder is unwilling to commit to the provisions of a), b), or c) above. In that case, the Patent Holder must select licensing declaration option e)

- "Unwilling to Commit to the Provisions of a), b), or c) Above".

e) Unwilling to Commit to the Provisions of a), b), or c) Above: The Patent Holder indicates an unwillingness to commit to the provisions of any of options a), b), or c) described above.

Options a), b), and c) above also allow the Patent Holder to indicate (with a check) whether its licensing declaration is limited solely to standards-track documents. If left unchecked, the Patent Holder's licensing declaration will be deemed to apply to all IETF documents,

including non-standards-track documents. This standards-track
qualifier is not relevant to licensing declaration options d) and
e),

See (editor)

Expires - February 11, 2004

[Page 6]

because under d) the Patent Holder has not yet indicated its specific licensing intention and under e) the Patent Holder has indicated a general refusal to commit to the provisions of any of options a), b), or c) above.

Section VIII in the template, "Other Notes," may be used for any additional information a discloser or Patent Holder wishes to provide. For example, a Patent Holder may use the "Other Notes" Section to indicate any other conditions on the licensing declaration option selected in Section VI (e.g., reciprocity).

Security Considerations

This document relates to IETF process, not any particular technology. There are security considerations when adopting any particular technology, regardless of whether patent or patent application disclosures or licensing declarations are implicated by such technology. A working group should take those security considerations into account as one part of evaluating the technology, but there are no security considerations per se with these IETF processes.

Intellectual Property Statement

The IETF takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on the IETF's procedures with respect to rights in standards-track and standards-related documentation can be found in [BCP-11](#). Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this specification can be obtained from the IETF Secretariat.

The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights which may cover technology that may be required to practice this standard. Please address the information to the IETF Executive Director.
