**High level guidance for the meeting policy of the IETF  
draft-ietf-mtgvenue-meeting-policy-03**

Abstract

This document describes a proposed meeting location policy for the IETF and the various stakeholders for realizing such a policy.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on June 9, 2018.

## [1.](#) Introduction

The work of the IETF is primarily conducted on the working group mailing lists, while face-to-face WG meetings mainly provide a high bandwidth mechanism for working out unresolved issues. The IETF currently strives to have a 1-1-1-\* meeting policy [[IETFMEET](#)] where the goal is to distribute the meetings equally between North America, Europe, and Asia that are the locations most of the IETF participants have come from in the recent past. This meeting rotation is mainly aimed at distributing the travel pain for the existing IETF participants who physically attend meetings and for distributing the timezone pain for those who participate remotely. This policy has neither been defined precisely nor documented in an IETF consensus document. This document is meant to serve as a consensus-backed statement of this policy published as a BCP.

## [2.](#) The 1-1-1-\* meeting policy

Given that the majority of the current participants come from North America, Europe, and Asia [[CONT-DIST](#)], the IETF policy is that our meetings should primarily be in those regions. i.e., the meeting policy (let's call this the "1-1-1" policy) is that meetings should rotate between North America, Europe, and Asia. It is important to note that such rotation and any effects to distributing travel pain should be considered from a long-term perspective. While the typical cycle in an IETF year may be a meeting in North America in March, a meeting in Europe in July, and a meeting in Asia on November, the 1-1-1 policy does not mandate such a cycle, as long as the distribution to these regions over multiple years is roughly equal. There are many reasons why meetings might be distributed differently in a given year, and that is fine as long as the distribution in subsequent years balances out the disruptions.

BACKGROUND NOTE: The IETF recognizes that we have not always been successful in following this policy over the past few years. In fact, at the time of writing, going back 6 years the meeting

[Page 2]

locations resemble more the previous 3-2-1 policy (9 Americas, 6 Europe and 3 Asia). This is attributable to two reasons:

- o we plan meetings 3 years ahead (meaning meetings for 3 of the 6 years had already been planned when the new policy was set)
- o there were some logistical issues (venue availability, cost etc.).

While this meeting rotation caters to the current set of IETF participants, we need to recognize that due to the dynamic and evolving nature of participation, there may be significant changes to the regions that provide a major share of participants in the future. The 1-1-1-\* meeting policy is a slightly modified version of the aforementioned 1-1-1 meeting policy that allows for additional flexibility in the form of an exploratory meeting denoted as a "\*". This exploratory meeting can be used to experiment with exceptional meetings without extensively impacting the regular meetings. e.g. these exploratory meetings can include meetings in other geographical regions, virtual meetings and additional meetings past the three regular meetings in a calendar year.

The exploratory meeting proposals will be initiated based on community consent. After such a proposal is initiated the IESG will make a decision in consultation with the Internet Administrative Support Activity (IASA) to ensure that the proposal can be realistically implemented. The final decision will be communicated back to the community to ensure that there is adequate opportunity to comment.

NOTE: There have not been a large number of such exploratory meetings under the current 1-1-1-\* policy (with IETF95 in Buenos Aires and IETF47 in Adelaide being the exceptional instances). IETF27 (Amsterdam) and IETF54(Yokohama) were earlier examples of exploratory meetings that pioneered Europe and Asia as regular IETF destinations. How often we intend to do such meetings in the future should also be an open topic for discussion within the community.

### **3. Implementation of the policy**

Once this meeting policy has been agreed upon, the policy will be provided to the IASA as high level guidance. Similarly, any exploratory meeting decisions will also be communicated to the IASA to be implemented. The actual selection of the venue would be performed by the IASA following the process described in [\[I-D.ietf-mtgvenue-iaoc-venue-selection-process\]](#).

The IASA will also be responsible

- o to assist the community in the development of detailed meeting criteria that are feasible and implementable, and
- o to provide sufficient transparency in a timely manner concerning planned meetings so that community feedback can be collected and acted upon.

#### **4. Re-evaluation and changes to this policy**

Given the dynamic nature of participant distribution in the IETF, it is expected that this policy needs to be periodically evaluated and revised to ensure that the stated goals continue to be met. The criteria that are to be met need to be agreed upon by the community prior to initiating a revision of this document (e.g. try to mirror draft author distribution over the preceding five years).

#### **5. Acknowledgments**

The author would like to thank Jari Arkko, Alia Atlas, Fred Baker, Brian Carpenter, Alissa Cooper, Dave Crocker, Spencer Dawkins, Stephen Farrell, Tobias Gondrom, Eric Gray, Bob Hinden, Ole Jacobsen, Olaf Kolkman, Eliot Lear, Andrew Malis, Yoav Nir, Ray Pelletier, Melinda Shore, John Klensin, and Charles Eckel for their ideas and comments to improve this document.
