

**NFSv4 Minor Version 2 Protocol External Data Representation Standard
(XDR) Description**
draft-ietf-nfsv4-minorversion2-dot-x-34.txt

Abstract

This Internet-Draft provides the XDR description for NFSv4 minor version two.

Requirements Language

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [RFC 2119](#) [[RFC2119](#)].

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on October 1, 2015.

[1. XDR Description of NFSv4.2](#)

This document contains the XDR ([[RFC4506](#)]) description of NFSv4.2 protocol ([[NFSv42](#)]). In order to facilitate implementations that support all of NFSv4.0, NFSv4.1, and NFSv4.2, the description includes operations, and other features of NFSv4.0 and NFSv4.1 that do not apply to NFSv4.2.

The XDR description is provided in this document in a way that makes it simple for the reader to extract into ready to compile form. The reader can feed this document in the following shell script to produce the machine readable XDR description of NFSv4.2:

<CODE BEGINS>

```
#!/bin/sh
grep "^\s*///" | sed 's?^\s*/// ??' | sed 's?^\s*///$??'
```

<CODE ENDS>

I.e., if the above script is stored in a file called "extract.sh", and this document is in a file called "spec.txt", then the reader can do:

<CODE BEGINS>

```
sh extract.sh < spec.txt > nfs4_prot.x
```

<CODE ENDS>

The effect of the script is to remove leading white space from each line, plus a sentinel sequence of "///".

[Page 2]

The XDR description, with the sentinel sequence follows:

<CODE BEGINS>

```
/// /*
