IANA Registry for the Session Initiation Protocol (SIP) "Priority"  
Header Field  
draft-ietf-sipcore-priority-00

## Abstract

This document defines a new IANA registry to keep track of the values defined for the Session Initiation Protocol (SIP) "Priority" header field. It updates [RFC 3261](#).

## Status of this Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on June 17, 2013.

Code Components extracted from this document must include Simplified BSD License text as described in Section 4.e of the Trust Legal Provisions and are provided without warranty as described in the Simplified BSD License.

Internet-Draft

SIP Priority Header Field Registry

December 2012

## 1. Introduction

This document defines a new IANA registry to keep track of the values defined for the Session Initiation Protocol (SIP) "Priority" header field. This header field was defined in [\[RFC3261\], section 20.26](#). It was clearly specified in a way that allows for the creation of new values beyond those originally specified; however, no registry has been established for it.

## 2. IANA Considerations

This document adds a new registry, "Priority Header Field Values." Its format and initial values are as shown in the following table:

Priority	Reference
non-urgent	<a href="#">RFC 3261</a>
normal	<a href="#">RFC 3261</a>
urgent	<a href="#">RFC 3261</a>
emergency	<a href="#">RFC 3261</a>

The policy for registration of values in this registry is "IETF Review," as that term is defined by [\[RFC5226\]](#).

## 3. Security Considerations

This document does not have any impact on the security of the SIP protocol. Its purpose is purely administrative in nature.

## 4. Normative References

- [RFC3261] Rosenberg, J., Schulzrinne, H., Camarillo, G., Johnston, A., Peterson, J., Sparks, R., Handley, M., and E. Schooler, "SIP: Session Initiation Protocol", [RFC 3261](#), June 2002.
