Kerberos number registry to IANA
draft-lha-krb-wg-some-numbers-to-iana-00

Abstract

Kerberos have many registers where only some have been registered, this document tries to cover the rest of them. There is a private space but that can not be used for implementation in released software. Also private is not available for all types. This document moves control over the numbers to an IANA number registry.

Status of this Memo

This Internet-Draft is submitted to IETF in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/1id-abstracts.txt>.

The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>.

This Internet-Draft will expire on September 24, 2010.

Provisions Relating to IETF Documents

(<http://trustee.ietf.org/license-info>) in effect on the date of publication of this document. Please review these documents carefully, as they describe your rights and restrictions with respect to this document. Code Components extracted from this document must include Simplified BSD License text as described in Section 4.e of the Trust Legal Provisions and are provided without warranty as described in the BSD License.

Table of Contents

1.	Requirements Notation	3
2.	Background	4
3.	Registration procedures	5
4.	Authorization Data Types	6
5.	Key Usage Numbers	7
6.	Address types	8
7.	Transited Encoding Types	9
8.	Name Types	10
9.	Error codes	11
10.	Security Considerations	12
11.	IANA Considerations	13
12.	Normative References	14
	Author's Address	15

1. Requirements Notation

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [[RFC2119](#)].

2. Background

[RFC4120] and other draft, RFC and private documents currently defines uses of Kerberos protocol numbers, after serveral confusions and collisions in shipped code its time to move them to an IANA registerty.

3. Registration procedures

A Kerberos number registration have the same "Registration procedures" for number based registration.

Exceptions are: Error codes and Key Usage Numbers.

- o 0-65536: Specification Required, expert review (krb-wg mailing-list) that the specification is implementable in an interoperable manner
- o 65536 and higher: first come, first serve

4. Authorization Data Types

Tom, please contribute the your list here.

5. Key Usage Numbers

Special considerations for key usage numbers in addition to what rules in specified in "Registration procedures".

Odd numbers SHOULD be allocated to checksums operations Even numbers SHOULD be allocated to encryption operations

Tom, please contribute the your list here.

6. Address types

Tom, please contribute the your list here.

7. Transited Encoding Types

Tom, please contribute the your list here.

8. Name Types

Tom, please contribute the your list here.

9. Error codes

Error codes may only be registered with Standards action.

Tom, please contribute the your list here.

10. Security Considerations

There is no security consideration, this documents move control over the registry to IANA.

11. IANA Considerations

This create a number of registries.

12. Normative References

- [RFC2119] Bradner, S., "Key words for use in RFCs to Indicate Requirement Levels", [BCP 14](#), [RFC 2119](#), March 1997.
