Referring to Internet Drafts as 'Internet Drafts' Rather Than 'Works in Progress'
[draft-roach-id-cite-00](#)

Abstract

This document updates [RFC 2026](#) to change the term "Work in Progress" to "Internet Draft."

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on October 8, 2018.

- [5.](#) Normative References [3](#)
- Author's Address [3](#)

1. Introduction

[Section 2.2. of \[RFC2026\]](#) allows publication of RFC with references to Internet-Drafts, with the requirement that such citations indicate that the Internet-Draft is labeled as a "Work in Progress." While this designation is frequently accurate when used in this way, it is sometimes useful for RFCs to refer to Internet Drafts that are not being actively maintained and which will likely never be published. As such documents are not technically "Works in Progress," this specification updates [RFC 2026](#)'s language to use the more broadly applicable phrase "Internet Draft."

2. Change to [RFC 2026](#)

This document updates [RFC 2026](#) by replacing the final paragraph of its [section 2.2](#) with the following text:

Note: It is acceptable to reference a standards-track specification that may reasonably be expected to be published as an RFC using the phrase "Internet Draft" without referencing an Internet-Draft. This may also be done in a standards track document itself as long as the specification in which the reference is made would stand as a complete and understandable document with or without the reference to the "Internet Draft".

3. Security Considerations

This change is administrative, and should have no significant impact on security.

4. IANA Considerations

This document requires no actions from IANA.

5. Normative References
