Domain Drop List Report
draft-sattler-domain-drop-list-report-02

Abstract

This document describes the content of a Domain Drop List Report based on the Report Structure and delivered by the Reporting Repository.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress".

This Internet-Draft will expire on March 25, 2020.

[1.](#) Introduction

Modern top-level domain registries provide many detailed reports and documents that their registrars require on a daily, weekly and monthly basis. These most commonly include transaction reports, as well as lists containing currently unavailable domains and current premium domain fees. These reports are critical for registrars' businesses and play an important role in accounting and operations processes as well as in sales and marketing activities. In the current set-up, registrars must download these reports from each registry's intranet differently according to each registry's document management set up.

Some domain name registries provide a list containing the expired domain names that will be deleted/purged shortly.

This document describes the content of a Domain Drop List Report based on the [[I-D.mcpherson-sattler-report-structure](#)] and delivered by the [[I-D.mcpherson-sattler-reporting-repository](#)].

[2.](#) Terminology and Definitions

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in [[RFC2119](#)] when specified in their uppercase forms.

2.1. Internationalized Domain Names

MUST be as defined in
[\[I-D.mcpherson-sattler-report-structure\]](#).

Sattler

Expires March 25, 2020

[Page 2]

2.2. Dates and Times

MUST be as defined in
[[I-D.mcpherson-sattler-report-structure](#)].

2.3. Character Encoding

MUST be as defined in
[[I-D.mcpherson-sattler-report-structure](#)].

3. Report Headings

The first row MUST be the column headings in the following order:

TLD	It MUST contain the top-level domain name and formatted according to section 2.1 of this document.
DOMAIN	It MUST contain the domain name formatted according to section 2.1 of this document.
EXPIRED	It MUST contain the date and time when the domain name expired formatted according to section 2.2 of this document.
PURGED	It MUST contain the date and time when the domain name will be purged from the registry system formatted according to section 2.2 of this document.

4. Examples

4.1. Single TLD File Example

This is an example of a domain drop list for a single top-level domain .example.

Filename: example_domain-drop-list_2018-11-01.csv.gz

```
TLD,DOMAIN,EXPIRED,PURGED
example,test1.example,2018-11-20T08:49:48Z,2018-11-25T08:49:48Z
example,test2.example,2018-11-20T08:49:50Z,2018-11-25T08:49:50Z
example,test3.example,2018-11-20T08:49:52Z,2018-11-25T08:49:52Z
example,xn--4gqvdy3r.example,2018-11-20T18:05:09Z,
2018-11-25T18:05:09Z
```

4.2. Multiple TLDs File Example

This is an example of a domain drop list for multiple top-level domains from example-registry.

Filename: example-registry_domain-drop-list_2018-11.csv.gz

Sattler

Expires March 25, 2020

[Page 3]

TLD, DOMAIN, EXPIRED, PURGED

example1, test1.example1, 2018-11-21T09:36:10Z, 2018-11-26T09:36:10Z

example2, test1.example2, 2018-11-21T09:36:11Z, 2018-11-26T09:36:11Z

example3, test2.example3, 2018-11-21T12:06:13Z, 2018-11-26T12:06:13Z

xn--zckzah, xn--r8jz45g.xn--zckzah, 2018-11-21T12:06:14Z,

2018-11-26T12:06:14Z

5. IANA Considerations

This document has no IANA actions.

6. Security Considerations

The domain drop report described in this document does not provide any security services.

7. Implementation Status

Note to RFC Editor: Please remove this section and the reference to [\[RFC7942\]](#) before publication.

This section records the status of known implementations of the protocol defined by this specification at the time of posting of this Internet-Draft, and is based on a proposal described in [\[RFC7942\]](#). The description of implementations in this section is intended to assist the IETF in its decision processes in progressing drafts to RFCs. Please note that the listing of any individual implementation here does not imply endorsement by the IETF. Furthermore, no effort has been spent to verify the information presented here that was supplied by IETF contributors. This is not intended as, and must not be construed to be, a catalog of available implementations or their features. Readers are advised to note that other implementations may exist.

According to [\[RFC7942\]](#), "this will allow reviewers and working groups to assign due consideration to documents that have the benefit of running code, which may serve as evidence of valuable experimentation and feedback that have made the implemented protocols more mature. It is up to the individual working groups to use this information as they see fit".

Add implementation details once available.

[Appendix A](#). Change History

[A.1](#). Change from 00 to DROPLIST 00

Changed draft name. Editorial changes and minor fixes.

[A.2](#). Change from DROPLIST 00 to DROPLIST 01

Editorial changes.

[A.3](#). Change from DROPLIST 01 to DROPLIST 02

Editorial changes.

[Appendix B](#). Acknowledgements
