**Moving [RFC 4693](#) to Historic  
draft-yevstifeyev-ion-report-07**

Abstract

This document requests [RFC 4693](#) to be moved to Historic status. It also obsoletes [RFC 4693](#).

Status of this Memo

This Internet-Draft is submitted to IETF in full conformance with the provisions of [BCP 78](#) and [BCP 79](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/1id-abstracts.html>

The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>

## **1. Introduction**

This document requests [RFC 4693](#) [[RFC4693](#)] to be moved to Historic status. It also obsoletes that document.

## **2. Moving [RFC 4693](#) to Historic status**

[RFC 4693](#) [[RFC4693](#)] established the IETF Operational Notes (IONs) series of documents on the experimental basis [[RFC3933](#)]. This series was intended to discuss the set of procedures that the IETF follows, but for which the RFC publication process is an inappropriate documentation vehicle.

Per [RFC 3933](#) [[RFC3933](#)], in March 2008 the IESG decided to terminate the IONs process experiment [[IESG-IONS](#)]. This document moves [RFC 4693](#) to Historic status, per [[HISTORIC](#)], to reflect experiment closure. Please contact the IESG at <[iesg@ietf.org](mailto:iesg@ietf.org)> for further details, including motivation for the termination and further destiny of IONs.

## **3. Security Considerations**

This document is of administrative nature only and therefore there are no security issues related to it.

## **4. Acknowledgments**

Various discussions of, valuable comments on and criticism of previous versions of this document were provided by (in alphabetical order) Harald Alvestrand, Brian Carpenter, Russ Housley, John Klensin, Barry Leiba, and Subramanian Moonesamy. Harald Alvestrand is also acknowledged for his work on [RFC 4693](#).
