Status

- -07 issued in mid-October
- We are still actively working on the draft, but not hearing much from the WG
- We would like to give one last push, then ask for WG Last Call by January 15
- In the meantime, here are some things we want more review on
# Terms added or significantly expanded since the -00 draft

<table>

</table>
A shorter list to focus on

- Global DNS / Private DNS
- In-bailiwick / Out-of-bailiwick
  - In-domain / Sibling domain
- QNAME
- Recursive resolver
- Split DNS
- Trust anchor
- Validating resolver
Some highlights (1)

• Global DNS / Private DNS
  – New terms added in January to help define what is meant by “the DNS”
  – Long list of facets of an naming system
• In-bailiwick / Out-of-bailiwick
  – Changed in July from 7719
• QNAME
  – Expanded and revised in latest version
Some highlights (2)

• Recursive resolver
  – Changed significantly in January

• Split DNS
  – Added last October

• Trust anchor
  – Added in January

• Validating resolver
  – Added in July
Proposing to add four new terms

• Originally suggested by Tony Finch during lead-up to RFC 7719
  – Recursive query
  – Non-recursive query
  – Iterative query
  – Iterative resolution
Next steps

• -08 with those terms (and a few other minor terms) this week
• Start threads on the top list of new terms again
• Get as much input as we can from the WG
