DDoS Open Threat Signaling (DOTS) Working Group

draft-ietf-dots-use-cases-09 Update

Roland Dobbins – Arbor Networks
Stefan Fouant – Copper River IT
Daniel Migault – Ericsson
Robert Moskowitz – HTT Consulting
Nik Teague – Verisign
Liang ‘Frank’ Xia – Huawei
Kaname Nishizuka - NTT
Changes for -09

- Re-organized use-cases so DOTS implementers can easily find what they need, operationally-focused readers can find what they need.
- Streamlined DOTS communications model listings.
- Added DDoS to Security Considerations (heh)
- Added additional inter-domain use-case (in -08)
What We Need from the WG!!!

- Need feedback on the HOME NETWORK use-cases in Section 3.2.2.
- Do we need a use-case which involves DOTS gateways?
- Do we need any additional intra-organizational use-cases? Specifics?
- Any additional feedback greatly appreciated!
- Are we essentially ready for WGLC? Need WG consensus (i.e., do we need to make any additional changes based on the above?).
DDoS Open Threat Signaling (DOTS) Working Group

Thank You!
