Resurrection of the anonymity draft

Stéphane Bortzmeyer - AFNIC

IETF 100 - Singapore

Context

1. By default, digital networks create **a lot** of data. If we do nothing, the Internet **improves** surveillance.

Context

1. By default, digital networks create **a lot** of data. If we do nothing, the Internet **improves** surveillance.
2. Not a lot of anonymity work at IETF
   1. Section 6.1.1 of RFC 6973 (privacy RFC)
   2. RFC 6235 (data anonymisation)
   3. RFC 7844 (anonymity profile for DHCP)

Need a general document about anonymity?

Need a general document about anonymity?

1. Terminology ⟵— This will be hard

Need a general document about anonymity?

1. Terminology ⟵ This will be hard
2. Should protocols promote anonymity? (Bas press, but also operations issues)

Need a general document about anonymity?

1. Terminology ⟵— This will be hard
2. Should protocols promote anonymity? (Bas press, but also operations issues)
3. Practical advices for protocol designers and implementers?
