

ROLIE

draft-ietf-mile-rolie-13 (-14)

Stephen Banghart

Dave Waltermire

Status of draft

- Currently in IESG Review
 - *Recently resolved /.well-known registration*
 - *New version (-14) to be posted by end of week (already on Github)*
- Successful AD, ART, and IESG review so far
 - *Many editorial changes*
 - *Several minor normative changes*

-9 and -10 changes (AD Review)

- Several editorial changes throughout.
- Adjusted TLS usage recommendations.
 - *Recommended against use of TLS 1.3 0-RTT*
- Added more detailed document reference to Security Considerations.

-11 Changes (ART Review)

- Updated TLS section to reference RFC 7525.
- Reduced severity of requirements around the “/” resource.
 - *Now allows implementations that do not support RFC 6546 to handle “/” as they wish.*
- Fixed inconsistencies in examples and schemas.
- Changed use of IRIs to URIs.
 - *Allows for greater consistency with current implementations*
- Editorial changes throughout.

-12 and -13 changes (IESG Review)

- Many editorial and minor changes/fixes.
- Additional examples fixed
 - *Changed “http:” to “https:”*
- Updated keywords/terminology boilerplate
 - *Updated to BCP 14*
- Reduced requirements imposed on security consortiums.
 - *Security consortiums can adjust security features to their needs.*

-14 Changes

- Removed /.well-known registrations
 - *ROLIE Discovery draft on the way*
 - *Updated examples to reflect this*
- Fixed minor name spacing errors in RNC schema
- All blocking issues resolved! (Hopefully!)

Way Forward - ROLIE

- ROLIE Discovery draft to allow for automated ROLIE discovery
 - *Separate draft allows ROLIE core document to progress in meantime*
- Thanks everyone for their reviews, comments, advice, and contributions to the document!

Way Forward - Extensions

- Updates to Software Descriptor and CSIRT ROLIE extensions.
 - *Please review recent changes*
- New format for extensions, work on an extension template progressing.
 - *Should this template go on the MILE wiki?*

CSIRT Extension – Issues for Review

- RID Requirements and the “/” Resource
 - Proposal A: Remove the requirement entirely.
 - Proposal B: Remove normative requirement, provide recommendations and guidance around supporting both ROLIE and RID.

- IODEF Specific Requirements
 - These requirements originate from an older version of ROLIE (-01). They need further review given changes made to the ROLIE core.
