# XMPP-Grid Status

Nancy Cam-Winget

([ncamwing@cisco.com](mailto:ncamwing@cisco.com))

November 2017

# Comments from WGLC

- Perhaps cut too much
- Need better mapping of XMPP to MILE applicability and use of discovery.

# Work is still in progress

- New author, thank you Peter Saint-Andre

- Current updates:
  - Clarified use to security based on SACM terms and their mapping to XMPP terms
  - Tightened the focus on the broker (pubsub) flow
  - Removed a lot of excess text

# Still remaining

- Need to add multiple examples and explain how to publish different kinds of payloads (e.g., IODEF vs. other formats)
