

JSON Web Token Best Current Practices

draft-ietf-oauth-jwt-bcp

Michael B. Jones
IETF 100, Singapore
November 2017

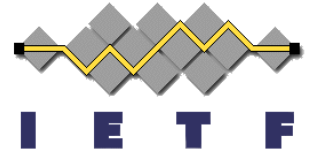

At IETF 99 in Prague

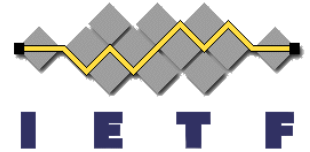

- Discussed goals and structure of draft-sheffer-oauth-jwt-bcp-01
- Decision made to adopt as working group document draft-ietf-oauth-jwt-bcp-00
- Requested reviews of the document

Since IETF 99 in July

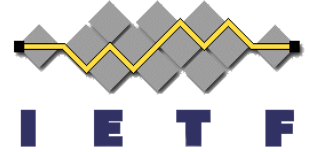

- There has been zero discussion of the WG JWT BCP document by the working group
- No reviews have been received
- *I'm unsure how to interpret this silence*

What I Won't Be Doing Here

- I will not be reviewing the background material on the goals and structure again
- Already done at IETF 99 – see it again at:
 - <https://datatracker.ietf.org/meeting/99/materials/slides-99-oauth-sessb-json-web-token-best-current-practices/>

Next Steps

- Additional reviews would be appreciated
 - Can we record some volunteers?
