Update on draft-ietf-opsec-v6-12

Kiran Kumar Chittimaneni
Merike Kaeo
Eric Vyncke

IETF-100, Singapore, November 2017

Issues Fixed from WGLC (April 2017)

- Thanks to Erik Kline, Tobias Fiebig, …
- Added
  - PI should be preferred to PA
  - Using a /64 per host
  - Moved SeND to the bottom
  - Be clear about not to recommend ULA
  - RFC 8064 is a good balance between privacy and stability
  - Dual-stack not the "preferred" method anymore

Next Steps

- We are not yet there ☹

- Authors need 'fresh blood' to finalize the document
  - Enno Rey, ERNW, has stepped forward
