

Private Media Framework

draft-ietf-perc-private-media-framework-05

Paul E. Jones, Cisco

David Benham, Cisco

Christian Groves, Independent

IETF 100 • July 2017

What's New

- Editorial corrections (“media distribution device” to “media distributor”, etc.)
- Updated references (in particular, RFC 7667)
- Clarifying language relating to “trust”
- Moved and updated some text in the Key Exchange section
 - Objective was primarily to clarify procedures
 - Clarified client/server roles when endpoint communicates with KD
 - Clarified that all conference participants use the same master salt
 - Added text saying that HBH key re-negotiation is via section 5.2 of [RFC5764]

That's It
