

# Resource-Oriented Lightweight Information Exchange (ROLIE)

draft-ietf-mile-rolie-13

---

IETF 100 - SACM Working Group  
Dave Waltermire, Stephen Banghart

# Status of ROLIE Core (In MILE)

---

- Currently in IESG Review
  - Navigating /.well-known registration
- Successful AD, ART, and IESG review so far
  - Many editorial changes
  - Several minor normative changes

# Software Descriptor Extension (In SACM)

---

- Adopted as WG Draft.
  - Draft is now “draft-ietf-sacm-rolie-softwaredescriptor-00”
  
- Updated to new ROLIE extension format
  - Work continues on a releasable extension template.
  - Please review the newest version

# CSIRT Extension (In MILE)

---

- Updated to new extension format.
- Call for review out in MILE, would appreciate any comments.

# Way Forward

---

- Software Descriptor needs review.
  - Authors are happy with state of document but would like review on the new formatting.

# Way Forward

---

- ROLIE core approaching stability in MILE.
  - Most recent extension updates included no normative changes, review on format or text changes appreciated.
  - As always, any expertise in CSIRT formats (IODEF, STIX) would be helpful in CSIRT extension work.
-
