

HTTP/2's Approach to Interop

HTTP/2

- Based upon an input document - SPDY
 - SPDY had many implementations
- Draft -04 identified as an “implementation draft” (June)
- First interop day next to an interim (August)
 - Expected 3-4 implementations
 - Got 10 (!)

- Interop events at every subsequent interim
- Tested whole stack, ad hoc
- Ability to negotiate versions allowed experimentation
- ... and early deployment; e.g., Twitter
