

# Priority Switching Scheduler

draft-finzi-priority-switching-scheduler-00

We propose the Priority Switching Scheduler (PSS), to **ensure more predictable output rates**.

Its key idea: a credit-depending priority change

# Priority Switching Scheduler

draft-finzi-priority-switching-scheduler-00

Usecase on 3-classes DiffServ architecture (following RFC5865) within AF class:

Range of AF output rate as a function of EF input rate and AF rate scheduler weight
