

# A Lower Effort Per-Hop-Behavior draft-ietf-tsvwg-le-phb

Roland Bless,  
Karlsruhe Institute of Technology (KIT)  
bless@kit.edu

# Next Steps

- Fix DSCP choice
  - Other PHBs should not be marked to LE, e.g., in case upper bits are cleared (IP precedence)
  - Need to open Pool 3 of DSCP Codepoints (XXXX01)
    - Requires process document
    - 000001 (DSCP= 1) or 000101 (DSCP= 5)
- Need at least one more revision (-03)
  - Update to new DSCP, remove LE-min/LE-strict discussion
  - Updates RFC-to-be draft-ietf-tsvwg-ieee-802-11
- Still: Reviews and feedback appreciated
- WG last call soon after -03 published
