A Lower Effort Per-Hop-Behavior

draft-ietf-tsvwg-le-phb

Roland Bless,
Karlsruhe Institute of Technology (KIT)
bless@kit.edu
Next Steps

• Fix DSCP choice
  • Other PHBs should not be marked to LE, e.g., in case upper bits are cleared (IP precedence)
  • Need to open Pool 3 of DSCP Codepoints (XXXX01)
    • Requires process document
  • 000001 (DSCP= 1) or 000101 (DSCP= 5)
• Need at least one more revision (-03)
  • Update to new DSCP, remove LE-min/LE-strict discussion
  • Updates RFC-to-be draft-ietf-tsvwg-ieee-802-11
• Still: Reviews and feedback appreciated
• WG last call soon after -03 published
