A Reference Model for Autonomic Networking

draft-ietf-anima-reference-model-06.txt

101st IETF, Mar 2018
Michael Behringer (editor), Brian Carpenter,
Toerless Eckert, Laurent Ciavaglia, Jefferson Nobre

Changes from -05

- Mainly working in comments from Sheng (Thanks!)
- Removed all comments about "current scope of ANIMA"
- Focus on a first, simple, implementable phase.
- Clear mention that there are likely more phases.
- Distinction between GACP and ACP
- State table: Explicitly mentioned now powercycle event in all states.
- Clarification about LDevID and IDevID
- Reduced the number of explicitly mentioned authors to 5, introduced Contributor section with Bing, John and Pierre.
- Editorial nits

Next Steps

- WGLC passed
- Next step: IESG review
