draft-sajassi-bess-evpn-virtual-eth-segment-03.txt

A. Sajassi (Cisco), P. Brissette (Cisco), R. Schell (Verizon), J. Drake (Juniper), J. Rabadan (Nokia)

IETF 101, March 2018

London

History

- Rev00 was published in April/2014 and presented at IETF 91

- Rev01 was published in July/2015 and MPLS access was added to the draft

- Rev03 is just a refresh of Rev01

Status

- The draft introduces the notion of vES for both Ethernet and MPLS access networks

- It is needed for DCI scenarios connecting EVPN DCs (VxLAN or MPLS) across MPLS core.

- This draft has been implemented and deployed

Nest Step

- Requesting for WG call
