

```
if (doh.drafts.empty()) close(doh);
```

- Finalizing draft-ietf-doh-dns-over-https.
 - **Last Call on the list within a few weeks.**
- Do you want to write a draft for doh?
 - We are open to rechartering but only if it's needed for a draft that we have received.
 - Current charter: *“The working group may define mechanisms for discovery of DOH servers **similar to existing mechanisms for discovering other DNS servers** if the chairs determine that there is both sufficient interest and working group consensus.”*
 - Deadline for asking for a WG slot at IETF 102 is **1 June 2018**.
- If we complete last call without any additional drafts, we will close the working group.
