Use Case for DDoS Open Threat Signaling

Dobbins, Migault, Fouant, Maskowitz, Xia, Teague, Nishizuka

Proposition for draft 11

The purpose of the presentation is to

- illustrate comments provided on the mailing regarding version 09
- Evaluate the WG consensus

Mainly organizational changes:

- Limiting the number of use cases
  - 3 use cases: Do we need more ?
- Limiting the level of details to the protocol level

Ugly copy / paste (5 minutes)... do not look at all details!

Proposition for draft 11

Proposed use cases:

- Use Case 1 : "End-customer with an overlay DDoS mitigation managed security service provider (MSSP)" (old section 3.1.2.2)
- Use Case 2: Upstream Transit Providers Offering DDoS Mitigation Services (old section 3.1.1.)
    - Include multiple links as well as mitigation initiated by the ISP
- Use Case 3: DDoS Orchestration (old section 3.2.3)

Other changes:

- Homenet was as been removed.
- The doc needs to clarify that DOTS client can be anywhere (Phone, CPE,...)

Thanks !
