

Measurement and Analysis for Protocols

Research Group (maprg)

London, March 20, 2018

co-chairs <maprg-chairs@ietf.org>:

Mirja Kühlewind <mirja.kuehlewind@tik.ee.ethz.ch>

Dave Plonka <dave@plonka.us>

Intellectual Property Rights (IPR)

The IRTF follows the IETF Intellectual Property Rights (IPR) disclosure rules. This is a summary of these rules as they relate to IRTF research group discussions, mailing lists and Internet Drafts:

- If you include your own or your employer's IPR in a contribution to an IRTF research group, then you must file an IPR disclosure with the IETF.
- If you recognize your own or your employer's IPR in someone else's contribution and you are participating in the discussions in the research group relating to that contribution, then you must file an IPR disclosure with the IETF. Even if you are not participating in the discussion, the IRTF still requests that you file an IPR disclosure with the IETF.
- Finally, the IRTF requests that you file an IPR disclosure with the IETF if you recognize IPR owned by others in any IRTF contribution.

The IRTF expects that you file IPR disclosures in a timely manner, i.e., in a period measured in days or weeks, not months. The IRTF prefers that the most liberal licensing terms possible are available for IRTF Stream documents, see RFC 5743. You may file an IPR disclosure here: <http://www.ietf.org/ipr/file-disclosure>

See RFC 8179 (BCP 79) for definitions of "IPR" and "contribution" and for the detailed rules (substituting "IRTF" for "IETF").

Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

- By participating in the IETF, you agree to follow IETF processes and policies.
- If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.
- As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.
- Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.
- As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (<https://www.ietf.org/contact/ombudsteam/>) if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

- BCP 9 (Internet Standards Process)
- BCP 25 (Working Group processes)
- BCP 25 (Anti-Harassment Procedures)
- BCP 54 (Code of Conduct)
- BCP 78 (Copyright)
- BCP 79 (Patents, Participation)
- <https://www.ietf.org/privacy-policy/> (Privacy Policy)

Introduction & Overview

- Call for Contributions:

We posted a Call for Contributions (CfC) on mailing list (February 1) and received ~15 proposed contributions; a few were out of scope or deferred to subsequent meeting; 11 will be presented today.

- Thanks for the proposals!
- Please supply abstract with details!
- We plan to continue to include “ads” for projects and works for which there wasn’t time for presentation in the agenda.
- Share ideas in the mailing list.

Agenda (i)

5m **Intro & Overview** (*chairs*)

Heads-up talks:

5m **Measurement Challenges in the Gigabit Era** (*Jason Livingood*)

5m **Zesplot - An attempt to visualise IPv6 address space** (*Luuk Hendriks*)

Updates on previous MAPRG talks:

10m **Measuring the quality of DNSSEC deployment** (*Roland van Rijswijk-Deji*)

15m **Update on IPv6 Performance Data** (*Tommy Pauly*)

15m **Update on TLS SNI and IPv6 client adoption** (*Erik Nygen*)

Agenda (ii)

- 10m **On the use of TCP's Initial Congestion Window in IPv4 and by Content Delivery Net** (*Jan Rüth*)
- 15m **A First Look at QUIC in the Wild** (*Jan Rüth*)
- 15m **Adoption, Human Perception, and Performance of HTTP/2 Server Push** (*Torsten Zimmermann*)
- 15m **Inferring BGP Blackholing Activity in the Internet** (*Georgios Smaragdakis*)
- 10m **Deploying MDA Traceroutes on RIPE Atlas Probes** (*Kevin Vermeulen*)
- 15m **An endhost-centric approach to detect network performance problems** (*Olivier Tilmans*)
