Update of Network Time Security for the Network Time Protocol

draft-ietf-ntp-using-nts-for-ntp-11

Daniel Franke, Dieter Sibold, Kristof Teichel

Changes from -10 to -11

- Changes
  - Inclusion of two sequence diagrams:
    1. NTS key exchange
    2. NTS time exchange
  - Section 5.7 was renamed to Sec. 6

- Not changed
  - Sec. 7 "Suggested format for NTS cookies" is still non-normative (there has been no further request to make in normative)

Results from the Hackathon

- Interoperability test was successful
  - Key exchange ✓
    - Client (DF) -> Server (ML) ✓
    - Client (ML) -> Server (DF) ✓
  - Time Exchange ✓
    - Client (DF) -> Server (ML)
- For more detailed information please consult the mailing list and Martin's presentation.

Next steps

- Draft version 12
  - Will include results from the Hackathon (e.g. clearer language about how the server sends NTS cookies)

  - WGLC
  - Second Hackathon in Montreal
