Initial Architectural Thoughts

The Plan

Deployment

Hmm.

That was too easy?

It was.

But now we have more questions and things to look at...

XMPP-grid Gaps

- XEP-0050 : Ad Hoc Commands
- XEP-0115 : Entity Capabilities
- XEP-0214 : File Repository and Sharing
- XEP-0248 : PubSub Collection Nodes
- XEP-0253 : PubSub Chaining
- XEP-0312 : PubSub Since
- XEP-0346 : Form Discovery and Publishing
- XEP-0401 : Easy User Onboarding

The Pipes Seem Ok...We need Semantics

The Major Open Questions:

- What are the components?
- What are their capabilities?
- How do we describe their logical interface?
- How do we describe their implementation interface?

More to come...

Architecture presentation will contain some additional information and possible next steps.
