

TLS Viz Wrap-Up

Chairs

Where do the chairs think we are at?

Plenty of discussion about the use cases; whether they conflict with other RFCs.

We are now discussing the 2nd technical solution; the 1st was not in scope of the WG.

The question is now whether the WG has consensus to adopt this draft:

- Draft does not need to be perfect.

- WG gets control of draft and can make changes.

- Consensus to be confirmed on list.

Questions on next slide ..

TLS Viz Hums

1. Do you support adoption of draft-rhrd-tls-tls13-visibility-01 as a TLSWG item?
2. Do oppose adoption of draft-rhrd-tls-tls13-visibility-01 as a TLSWG item?
