TLS Viz Wrap-Up

Chairs
Where do the chairs think we are at?

Plenty of discussion about the use cases; whether they conflict with other RFCs.

We are now discussing the 2nd technical solution; the 1st was not in scope of the WG.

The question is now whether the WG has consensus to adopt this draft:
- Draft does not need to be perfect.
- WG gets control of draft and can make changes.
- Consensus to be confirmed on list.

Questions on next slide ..
1. Do you **support** adoption of draft-rhrd-tls-tls13-visibility-01 as a TLSWG item?

2. Do **oppose** adoption of draft-rhrd-tls-tls13-visibility-01 as a TLSWG item?
