

# Proof-of-Possession Key Semantics for CBOR Web Tokens (CWTs)

**draft-ietf-ace-cwt-proof-of-possession**

Michael B. Jones  
IETF 102, Montreal  
July 2018

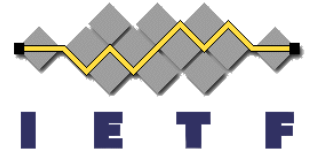

# Status

- At IETF 99 we decided to try to do this fast
- It's a simple spec that intentionally parallels RFC 7800 in structure and content
- CWT became RFC 8392 in May
  - CWT PoP is also required for many ACE specs
- We conducted WGLC after IETF 101
  - Draft -03 addressed review comments
  - Spec remains closely parallel to RFC 7800

# Next Steps

- Time for Shepherd review
- Then address shepherd comments and request publication
