Steinthor Bjarnason sbjarnason@arbor.net
Kent Watsen kwatsen@juniper.net

Status

- Passed Working Group Last Call (June)
- One additional IPR disclosure filed as part of shepherd IPR question
  - https://datatracker.ietf.org/ipr/3233/
  - Was already disclosed for NetConf zerotouch (just explicit disclosure of applicability also to BRSKI)
- Shepherd write-up to AD this week
  - Minor?! formal nits (unnecessary down-rev etc.) noted to Authors
    - BrianC found explanatory section authorization of pledge missing
      (could also just be that authorws wanted to fully call it out-of-scope. Just fix dangling pointer).
  - Will mention nits in shepherd writeup if they can not be fixed in time
  - AD would like to start IETF last call in ! 2 weeks
    - Shepherd: fixing nits should be fine through next rev from IETF/IESG review.

Thank You!
