Replace

- Stuart can't make it to this session
- There's been discussion on the list, and it seems mostly resolved
- Next Steps: call for adoption followed closely by WGLC

Fetch Snippet

- See slides
- Next Steps: call for adoption and feedback

Client ID

- See slides
- Next Steps: call for adoption and feedback

Other Business

- Spam / Phishing
- Created Modseq / Global Modseq

Spam / Phishing

- $Junk / $NotJunk / $Phishing keywords exist
  - Is that enough?
  - Do we need to issue guidance for clients / servers about what to do when these are set/cleared?

Created Modseq

- Came out of JMAP work
  - We already have a per-user global modseq counter in Cyrus IMAPd
  - CREATEDMODSEQ allows us to know if something was "created" or "updated" since previous state.
  - Is this worth bringing to IMAP?
  - "MODSEQROOT" similar to QUOTAROOT.
