On the Politics of Standards

How this fits in hrpc

Protocol impacts (RFC8280)

Dynamics impacting protocols (and architecture) development (this document)

What

Describing the political
aspects of protocols

Why

- Internet is part of the basic infrastructure of information societies

Why

- Internet is part of the basic infrastructure of information societies
- Protocols that are being developed in the IETF influence information societies

Why

- Internet is part of the basic infrastructure of information societies
- Protocols that are being developed in the IETF influence information societies
- Part of this process is political (which includes economics), but this is not described in RFCs

Why

- Internet is part of the basic infrastructure of information societies
- Protocols that are being developed in the IETF influence information societies
- Part of this process is political (which includes economics), but this is not described in RFCs
- We need to take this into account if we want to understand our own decision making

Why

- Internet is part of the basic infrastructure of information societies
- Protocols that are being developed in the IETF influence information societies
- Part of this process is political (which includes economics), but this is not described in RFCs
- We need to take this into account if we want to understand our own decision making
- Making this explicit helps us to understand and take it into account (also if this is sometimes uncomfortable)
