Updates on
« Network coding and satellites »

draft-kuhn-nwcrg-network-coding-satellites-05

Nicolas KUHN (CNES) and Emmanuel LOCHIN (ISAE)

Changes between *-04 and *-05

- Assessing Vincent's comments
  - Contradictory information in the introduction on the current usage of NC in SATCOM
  - Description on SATCOM specific elements in the glossary
  - Adding details on why we consider a multi-gateway system
  - Improving figures clarity (work in progress)
  - Gateway handover use-case : details on how NC could be applied
  - Conclusion : addition of a conclusion

Towards *-06

- Include modifications Vincent's *-05 review
  - Improve figures
  - Add a research challenges section
  - Add coupled of discussion related to security [to be confirmed]

- WG item ?
