

# Editors' Update

QUIC IETF 102, Montreal, July 2018

Martin Thomson

# Stream 0 Design Team

# -13 Significant Changes

Stream 0 (Ian)

ECN

Several changes to Connection ID handling

Server Preferred Address transport parameter

Stateless Reset can be sent by clients

Rules for extending QUIC with new frames

Significant changes to HTTP and QPACK (Mike)

# State of Drafts

~100 open issues

More than half of these are editorial, parked, or v2

Many - possibly most - are close

- some have pull requests
- some are fairly simple
- some have solutions on the issue

We'll need help closing issues
